Fast Turning Target Mechanism

Range Systems has been an industry-leading solution provider of live fire facilities since 1994. Our team has an extensive history of engineering, fabricating and installing superior performing products worldwide. We have set the standard for range safety, unique capabilities and unmatched ballistic performance within our solutions.

Range Systems is the exclusive North American distributor of Militec products. Militec offers a full range of target mechanisms suitable for basic to advanced marksmanship, classification and close quarter battle scenarios.

Product Overview

The Fast-Turning Target (2200MF) is designed with advanced shooters in mind. This turning target mechanism will provide for classification and judgment/decision shooting with high performance turning motors and hit sensing in any indoor or outdoor shooting range.

Key Features & Benefits

- A fully charged battery has sufficient capacity to turn a standard fig. 11 target board in excess of 2,500 times
- Ability to control up to 256 individual targets with eight separate channels
- Operational distance up to 1,000 yards
- The hit sensor is fitted internally and each target can be independently set to respond to hits on the target
- The tubular steel frame provides extra protection, makes it easy to carry and provides a stable location when in use
- The enclosures are manufactured from zinc coated sheet steel and finished in polyester powdered paint that is stoved to provide a hard and durable finish.

Specifications

- Weight: 35 lbs (without battery pack)
- Dimensions: 15" x 12" x 13" (L x W x H)
- Turn Time: 0.3 sec. (edge to face)
- Hit Sensing: Internally mounted and adjustable
- Temperature: 5° to 149°F
- Construction: Corrosion resistant steel
