

## ▶ Gun Clearing

### Guardian TS™

#### New and Improved for 2010

Guardian TS™ gun clearing device is handgun and rifle capable up to standard 7.62mm ammunition. Rubber granular material fills the interior of the steel housing and molded rubber channel opening prevents weapon scratching. The hinged cover prevents debris and precipitation from getting inside and when opened it provides a magazine tray to use while clearing a weapon. Handles and wheels give the Guardian TS™ mobility. Predrilled holes on the base are provided for fixed mounting.

#60\_19\_021 Wt. 142 lbs.

Unit height: 31.75"

### Guardian Jr.™

Compact sized handgun clearing trap features a unique gas port protection system to channel weapon gas away from the shooter. Designed to accept standard handgun rounds up to .44 Magnum. Convenient built-in handle for transporting and positioning. Options include a wall bracket or floor stand.

#### Guardian Jr™ tabletop
