FOR IMMEDIATE RELEASE

Range Systems selected by Gander Mountain for Academy firing ranges

New Hope, MN, November 15, 2011 --- Gander Mountain®, the nation's largest retailer of firearms, selected Range Systems Inc. to design, build, and install customized firearm training systems for their Gander Academy L-Range™ facilities across the country.

Each Gander Academy® L-Range™ is a unique destination experience offering the highest level of firearms training ever made available to the public at wide-spread and convenient locations. To date, Range Systems has completed live-fire ranges for Gander Academy® in Minnesota, Wisconsin (two locations), Florida, Texas, and Kansas with additional sites being planned for the near future.

From concept to design and execution, Range Systems worked closely with Gander Mtn™ to develop live-fire ranges that met their high standards and expectations for range safety, technology, and customized systems. These ranges are unparalleled in safety to provide a family-friendly environment for the novice to the advanced enthusiast interested in developing and improving their firearms proficiency.

About Range Systems

Range Systems specializes in the design and manufacture of live fire shoot houses, ballistic containment systems, indoor and outdoor firing range equipment, and other specialty equipment for small arms and tactical training required by the armed forces, law enforcement agencies, and the security industry worldwide.
