

The Challenger Target Pop-Up Target System has broken the barrier- now you can **safely shoot reactive pop-up targets indoors** without expensive special ammo.

The Challenger Target Pop-Up Target System is the practical and affordable way to increase your training and range revenue. With this system, you're able to set up an endless array of shooting scenarios in minutes and control the action from a single remote.

Key Features:

- Safe for indoor range use
- Takes your training to the next level
- Great for leagues
- 100% pneumatic, no batteries or electric needed. (Self supplied CO2 tank)
- Multiple modes of use
- Instructor led or customers use on their own

Operation:

The Challenger is so simple, no batteries or electricity are needed to operate it, which means there are no expensive retro-fits or construction to set it up at your range.

With multiple modes of use: manual, all-up and chain reactor, the Challenger creates a fun experience for trainers and customers alike. It's so easy that customers can use it by themselves. They simply walk in and hit the green button.

Range Owner Benefits:

- Make training fun and exciting
- Enhance league night offerings
- Sell more fun, sell more ammo

Shooter Benefits:

- Improves target acquisition and response time
- Opportunity to hone decision making skills
- Creates a fun experience
