

NEW!

Range Systems introduces the NEW Guardian™ Compact Clearing Trap

The Guardian Compact Clearing Trap is an ideal safety measure for law enforcement agencies, commercial ranges, gunsmiths, and shooters everywhere. The hazards of a negligent discharge are real and dangerous so safely clearing a firearm is crucial when handling weapons.

The steel housing is ¼ inch AR500 steel with a Dura-Bloc™ ballistic rubber interior for capturing the round. A soft poly cap allows weapon insertion without scratching the barrel and predrilled holes are provided for securely mounting the Guardian Compact Clearing Trap.

Equipping patrol vehicles with a Guardian Compact Clearing Trap provides law enforcement personnel a method to safely check their firearm or confiscated weapons before handling or transporting.

A safe and convenient method for checking a firearm

- ¼ inch AR500 steel on all sides of the housing
- Dura-Bloc ballistic rubber interior
- Lightweight and portable
- Tear drop mounting holes
- Can be mounted virtually anywhere
- Designed to contain standard handgun rounds up to .44 Magnum
- Soft poly cap insertion covering prevents barrel scratching
- Finished with a hammered grey powder coat paint

Weight 13 lbs.
Dimensions 11.5" x 4" x 4.5"
SKU TP5095

Note: The exterior steel housing should be inspected after a discharge to ensure ballistic integrity.
