

Range Systems shooting lane dividers organize the firing line into defined shooting positions, provide a location for mounting local target controls, and offer protection from adjacent shooting positions.

## Pro-Tacts™ Standard

Fabricated from ballistic steel plate and covered with Dura-Panel™ ballistic rubber, Range Systems Pro-Tacts™ Standard lane divider minimizes side blast interference from adjacent shooting lanes and reduces the hazard of misdirected shots. The Dura-Panel™ covering is an anti-ricochet material that also assists with reducing noise at the firing line.

A built-in shooting shelf provides a convenient location for storing extra rounds, magazines, and shooting accessories. You can choose from two

shelf styles; a laminated shelf top that features a recessed area or a Dura-Panel™ rubber top that provides a resilient, non-skid surface. Both styles are designed to hold items securely and accommodate a Sight-Bloc™ shooting rest. Range Systems Pro-Tacts™ lane dividers are opaque and optimal for providing privacy for each shooting lane.

---

*Having the proper lane dividers for your range can dramatically improve the perception and reality of the safety and quality of the range.*

---

## Pro-Tacts™ Clearview

The Pro-Tacts™ Clearview shooting stall provides an open view of the firing line and shooters. This is particularly important in ranges when the range master must monitor and observe the shooting activity at the firing line. Constructed of ballistic glass, it offers the same protection to the shooter as our standard Pro-Tacts™ lane divider but with visibility of the firing line and occupants to provide an unobstructed view. The Pro-Tacts™ Clearview ballistic glass panels can be detailed to include your logo or company name to be unique to your facility.

## Pro-View™ Premium

Range Systems Pro-View™ is the premium model in our lane divider product family. The Pro-View™ lane divider delivers firing line visibility, a deeper footprint to accommodate an instructor and shooter, and the ballistic and acoustic values of our Pro-Tacts™ Standard model.

A built-in shooting shelf provides a convenient location for storing extra rounds, magazines, and shooting accessories. You can choose from two shelf styles; a laminated shelf top that features a recessed area or a Dura-Panel™

rubber top that provides a resilient, non-skid surface. Both styles are designed to hold items securely and accommodate a Sight-Bloc™ shooting rest.

The additional depth provided by the Pro-View™ at the firing line not only allows ample room for instructor and student training but also creates a more private shooting experience for people to enjoy. Adding an optional entry gate to the Pro-View™ shooting divider provides the ultimate in privacy and safety.

---

*People will enjoy shooting in their own private shooting stall and can do so with the confidence that they are safe from neighboring shooters in the next lane.*

---

Range Systems offers three standard styles of shooting lane dividers and we can custom a style to fit your unique needs.
