

## Product Overview

With the Challenger Target Pop-Up Target System you can safely shoot reactive pop-up targets indoors without frangible ammo or range damage. The Challenger Target Pop-Up Target System is the practical and affordable way to increase your training and range revenue. With this system, you're able to set up an endless array of shooting scenarios in minutes and control the action from a single remote. The Challenger creates a fun experience for trainers and customers alike.

The Challenger Pop Up Target Systems works in any range without expensive retro-fitting. It offers multiple modes of use: manual, all-up and chain reactor.
