

Range Systems has been an industry-leading solution provider of live fire facilities since 1994. Our team has an extensive history of engineering, fabricating and installing superior performing target retrieval systems worldwide. We have set the standard for range safety, unique capabilities and unmatched ballistic performance within our solutions.

At Range Systems, we understand that every project is unique and requires thoughtful planning and consideration. Through decades of experience our team is ready to work with you in selecting the right target system to meet your needs.

## Product Overview

The Fixed Overhead Turning Target System is a dynamic decision making product that is primarily used in tactical training environments. The system is designed for fixed down range targets to be networked together and controlled with a master control screen to form an integrated target system of up to 60 target lanes. The targets can be operated individually or grouped in any combination as part of a time drill or training scenario. The master control can store up to 100 training scenarios, with each training scenario having up to 30 separate steps.

## Key Features & Benefits

- Ceiling mounted fixed target system
- 360° turning target presentation (Shoot/ Edge/ No Shoot)
- Randomized edging
- No exposed target clmap
- 6' Lateral Target Movement
- Rugged "I" Beam symmetrical track system made from 11-gauge steel
- Integrated with the Fixed Target Master Control
- Easily maintained, low cost replacement parts
- Available with eRange option (remote Wi-Fi tablet control)
- Industry leading 5 year warranty

## Specifications

- 120VAC (15A)  $\pm 10\%$  60Hz, single phase. (North American voltage)
- 240VAC (15A)  $\pm 10\%$  50Hz, single phase. (European voltage)
- 12" Color Touch Screen
- Integration and control of other Caliber devices (CRM, PA, Range safety lights and 3rd party devices)
