CR-2 Master Range Control

The CR-2 target retrieval system can be used as a stand-alone system controlled with a local lane control or can be networked together and controlled with a master control to form an integrated target retrieval system.

The CR-2 Master Range Control has an 8" color touch screen and can operate up to 20 target lanes simultaneously or selectively. It also offers an assistance/help feature and a timer to manage lane time. The color screen provides the range operator with a visual display showing lane activity, lane time, and assistance call function.

Control includes: Manual and Booth Control

Key Features & Benefits

- Allows target lanes to be networked together to form an integrated target retrieval system.

- With its touchscreen control, the operation is intuitive, and the color screen provides a clear visual of lane status and current conditions.

- The lane management system eliminates the need for a separate range timer. For commercial ranges, lane rental time can be monitored and controlled from the CR-2 Master Control allowing easy check-in and smooth transition between lane rentals.

Manual Control Screen
The manual screen can control all or any of the lanes, by selecting the lanes from the list on the right hand side of the screen. Press the "GO" button next to the required distance, and the selected lanes will travel to that distance.

Booth Control Screen
The booth control screen enables and disables the booth control screens. This screen also contains the lane time management.

CR-2TL Master Range Control

The CR-2 TL Master Range Control has a 12" color touch screen and can operate up to 40 target lanes simultaneously or selectively. This Master Control can allow the trainer to control all lanes simultaneously or a select group. Additionally, it also offers an assistance/help feature and a timer to manage lane time. The color screen provides the range operator with a visual display showing lane activity, lane time, and assistance call function.

Control includes: Manual, Auto, Program Scenarios, Booth Control, Lighting

Key Features & Benefits

- Allows target lanes to be networked together to form an integrated target retrieval system.

- With its touchscreen control, the operation is intuitive, and the color screen provides a clear visual of lane status and current conditions.

- The CR-2TL Master Control also has a lane time management system, so the need for a separate range timer is eliminated. For commercial ranges, lane rental time can be monitored and controlled from the CR-2TL Master Control allowing easy check-in and smooth transition between lane rentals.

Manual Control Screen
The manual screen can move and turn selected targets, including: target distance, target exposure, time drill, and target lane selection
