

Range Systems has been an industry-leading solution provider of live fire facilities since 1994. Our team has an extensive history of engineering, fabricating and installing superior performing target retrieval systems worldwide. We have set the standard for range safety, unique capabilities and unmatched ballistic performance within our solutions.

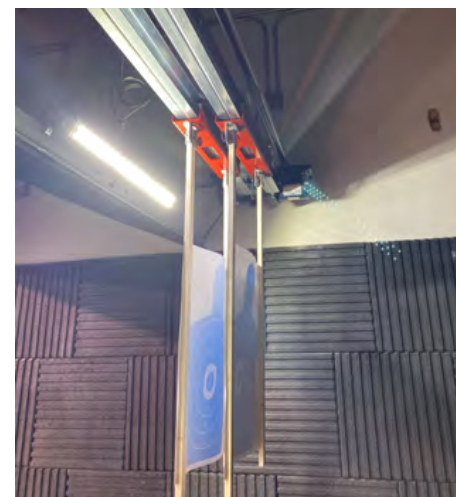

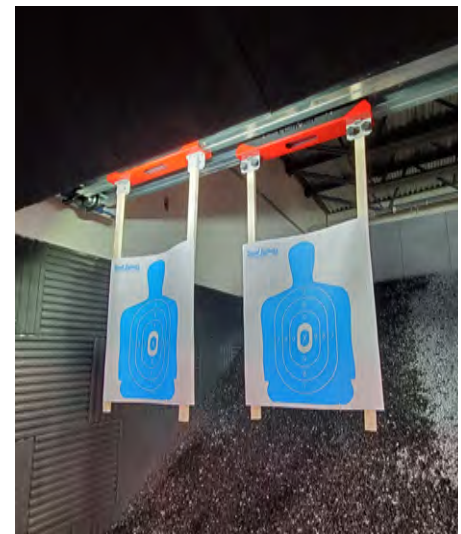

At Range Systems, we understand that every project is unique and requires thoughtful planning and consideration. Through decades of experience our team is ready to work with you in selecting the right target system to meet your needs.

Product Overview

The Running Man Target System is a lateral moving target that provides a dynamic training environment to advance decision making skills. It is available in single or dual running man modes. The unique design allows many training and practice applications. The modular plug and play system allows for a variety of training scenarios.

Key Features & Benefits

- Single or dual running man mode
- Ceiling mounted target system
- Industrial control, dedicated to controlling the target system only
- User friendly TFT color control touch screen
- Programmable target position
- 3 Speed Control settings. (Average human Walk/ Jog/ Run speeds)
- Independent running man control
- Cable - propelled target carriers
- Dynamic target carrier braking
- Rugged "I" Beam symmetrical track system made from 11-gauge steel
- Maximum distance 100ft/ 30yds/ 30m
- Stand alone control or full integration with target system master control
- Easily maintained, low cost replacement parts
- Available with eRange option (remote Wi-Fi tablet control)
- Industry leading 5 year warranty

Specifications

- 120VAC (16A) $\pm 10\%$ 60Hz, single phase. (North American voltage)
- 240VAC (16A) $\pm 10\%$ 50Hz, single phase. (European voltage)
- 7" Color Touch Screen
- Integration and control of 3rd party devices upon request
