

Product Overview

The Range Systems Pro-Touch Series Master Controller features a user-friendly 15.6" touchscreen interface, allowing range masters to manage target lanes either together or individually. It includes lighting control, pre-programmed training, and lane management timer. The high-resolution color display offers a clear view of lane activity, remaining time, assistance requests, and hit detection. Additionally, it provides Course of Fire training sessions along with a customizable option to create personalized training drills, making it easy to tailor exercises to individual training needs.

Key Features & Benefits

- **Integrated Target System:** Enables target lanes to be networked together for a seamless target retrieval system.
- **User-Friendly Touchscreen:** Intuitive touchscreen operation with a clear color display showing lane status and real-time conditions.
- **Efficient Lane Management:** Eliminates the need for a separate range timer. For commercial ranges, the Master Control allows easy monitoring and management of lane rental time, streamlining check-ins and lane transitions.
- **Strike Monitoring:** Alerts the range officer to errant rounds striking the carrier, enhancing safety and ensuring proper shooting discipline.
- **Cease Fire Button:** Instantly returns all lanes to the home position and shuts down the range, providing a quick and effective safety measure when needed.
- **Lane Assignment & Personalization:** Allows for lane assignment options to personalize the shooter's experience, ensuring a customized and efficient training session.
