

Product Overview

Pro-Touch is a cutting-edge target retrieval system designed for performance, precision, and ease of use. Its 10.1" touchscreen runs proprietary targeting software, providing a user-friendly and highly responsive interface.

The system ensures smooth carrier movement with ramp-up and soft-stop functions, travels 25 yards in 7 seconds. Additional features include an overhead lane light, a one-hand target clamp, and a branded LCD screen displaying the lane number.

The Pro-Touch is built for speed, accuracy, and adaptability, making it the ideal solution for modern shooting ranges.

Key Features & Benefits

- 10.1" LCD touch panel
- Carrier ramp-up and soft-stop functions
- Carrier travels 25 yards in 7 second
- One hand operation target clamp
- Overhead dimmable lane lighting with white / blue / red strobe
- Built in 3.2" LCD screen with lane numbering and branding capabilities

PRO-TOUCH SERIES SPECIFICATIONS
